Føremål_med_tiltaket_maksimum_5_liner_: Children are trained to learn all the basic senses of the learning like visual, auditory & kinaesthetic, thus improves the learning ability,

Increases the speed and accuracy of the Children in mathematical calculations.

Improves the learning ability, writing skills, endurance and logical thinking of the child.

Improves the concentration level as well as comprehension and boost up the memory power and learning capabilities of the child.

Helps children in building imaginative skills and develops all round academic proficiency.

Improves visualizing ability and self reliance of the student, hence the learning time will get reduced.

Informasjon_om_tiltaket_til_dømes_aktivitet_omfang_målgruppe_tidspunkt_for_gjennomføring_m_v_: This programme helps children worldwide to improve their arithmetic, concentration, imagination, memory skills and many more.

For an example:

During the autumn of 2012 a "Brainobrain" was implemented in Oxhagsskolan in Akalla, SWEDEN, which was then followed up in autumn 2013, with a more extensive project in the municipality of Haninge, SWEDEN. Outcome at 3 months showed that the project classes raised their results in mathematics, with an average of 30% against the reference classes regardless of the school culture, or the teacher's past experiences.
