Vedlegg: AGENDA HIGH LEVEL MEETING ENERGY- evening programme _3 February 2016.pdf;12a Resolution discard ban from MRG.docx;5e3 Mapping of alternative fuel in public transport among North Sea Commission 2nd edition.docx;Program_A4_Building Blocks for the Future_09.pdf;image003.jpg

Dear Eleni,

Here are the documents and follow-up points from the skype discussions earlier.
I have copied in the relevant people so they can access any documents.

- 1) The North Sea Conference is on 15th and 16th June and the ABM is on 17th June at Legoland Hotel, Billund, DK. Draft programme enclosed. Cordeiro (and yourself, I presume) could attend the event on 15th and stay for the dinner that evening then fly on to Helsinki the next day. There are lots of SAS flights from Billund that connect up to Helsinki. There is one direct flight on Finnair but that is in the evening so it is maybe too late for you.
 - a. The conference is very much about the Interreg North Sea Region Programme, they fund it after all, and there are mainly project developers there. NSC people are there too and we will set up some kind of political workshops or side events for our politicians. Day 2 are study.
 - b. We would like to know when we will have the final confirmation of Cordeiro's participation? We are thinking he should have a short speech at the opening plenary which starts at 13.00h, or maybe he could be involved in one of our workshops. Which themes is he most happy to talk about?
 - c. Please let us know since the programme agenda is pretty much closed.
- 2) High level meeting under Dutch PCY this week on North Sea, renewable energy and regional cooperation. As mentioned we managed to get an invitation for John Lamb for the stakeholder event the evening before (programme enclosed), but he was unable to attend, Kerstin cannot attend either and they would not let me come (not important enough!). The Dutch Executive Committee member will represent her own region and NSC, we have briefed her on NSC energy positions. The next day is the DG level meeting on North Sea: <http://english.eu2016.nl/latest/events/2016/02/04/high-level-meeting-energy> - we would like to know the full agenda and who are the speakers/participants as well as how the discussions go and what they decide. So hope you can help us there. We do not have anyone on the inside.
- 3) NSC resolution on discard ban enclosed
- 4) Overview from our Transport Group enclosed: Mapping of alternative fuel in public transport among North Sea Commission (NSC) member regions
- 5) Åsa and I will discuss how to coordinate a Swedish contribution under the Dutch water session from Baltic/North Sea and let you know our suggestion

Kate Clarke
Executive Secretary

North Sea Commission
