Om prosjektet

Shot reverse shot it's an event that sets a dialogue amongst local (Hordaland based) and international artists that share similar interests, poetic practices or conceptual preoccupations.. and at the same time preserving the particularities of the environment they work in. Any artistic area is considered and the main focus for this dialogue is based on each participant's artistic research, the common places as well as the divergences will be the materials to create this work-based dialogue. Once a year we invite an international artist to present hers/his work together with one or two local artists. (more on this project in attachment)
