“I believe when we truly embrace collaboration as a core value for Ubuntu (You are because I am and vice versa), the spirit of working together, collectively solving problems and contributing to the society becomes simply a part of the spirit and mind-set of the universe. I also use collaboration for culture exchange, collective creativity, exploration of new ideas, untapped/seen talent or unheard stories, turning negativity into positivity. All this done in the name of Ubuntu.”

-Simbarashe Norman Fulukia
