Letter of Intent

To whom it may concern,

We refer to the proposed KPN project "**Safe Hydrogen fuel handling and use for efficient implementation – SH₂IFT**", coordinated by SINTEF, focused on:

- **Increased knowledge on safety of hydrogen technology**, especially focussing on handling and use of large volumes, within (semi-)closed environment and in maritime transport.
- **Increased understanding of specific hydrogen technology acceptance and bottlenecks**, e.g. (public) end users, decision-makers and authorities acceptance vs hydrogen safety and handling procedures

Hordaland County Council believes that the outcome of the proposed project will contribute to an increased understanding of the most important aspects within hydrogen safety and public acceptance. We see this as vital for a smooth and fast introduction of hydrogen technology for sustainable transport and energy storage.

Hence Hordaland County Council will support and contribute to the proposed project in the following manner:

- Cash contribution to the project: 50.000 NOK/year for 4 years. A total of 200.000 NOK.

Project contact person: Tale Halsør

On behalf of Hordaland County Council

Bård Sandal
fylkesdirektør regional utvikling

Sølve Sondbø
Klima- og naturressurssjef
